

We are delighted to announce our next Info Day

Innovation in Lipids and LNP Formulations

When ?
Where ?

June 9, 2026

Elysées Lincoln, 14 rue Lincoln,
75008 Paris, France

SAVE THE DATE

This event will be an opportunity to present the lipids developed by Evonik and to inform you about the challenges and solutions available for the development and production of lipid nanoparticle (LNP) formulations for nucleic acid delivery. Numerous examples from academia and innovative companies will illustrate this program.

More details hereunder

TIME	TOPIC
08:30-09:00	Registration & welcome coffee
09:00-09:20	Information on APGI, partners and day Karine Andrieux, APGI - France
09:20-10:00	Introduction to Evonik Health Care, your partner for advanced and complex formulations George Smith & Gabriel Payo, Evonik
10:00-10:40	Advancing LNP technologies: freeze-drying strategies, multiparametric functional assays and rational formulation design Manon Berger, University of Liège - Belgium
10:40-11:10	Coffee break
11:10-11:50	Stable and Precise mRNA Delivery: Transforming Respiratory Medicine and Beyond Steffen Meyer, Ethris - Germany
11:50-12:30	Lipidic nanocarriers to treat disease during pregnancy Karine Andrieux, University of Paris Cité - France
12:30-13:40	Lunch break
13:40-14:20	Innovation in Lipid and LNP Development at Evonik Sophie Hammer, Evonik - Germany
14:20-15:00	Versatile Lipid Nano Particle formulation systems for all scales Svea Stephan, Knauer - Germany
15:00-15:30	Coffee break
15:30-16:10	Lipopolysaccharide analysis and quantification: challenges and solutions Flavien Dardelle, LPS-Biosciences - France
16:10-16:50	Wrap-up and future trends Panel discussion
